Student's Feedback Form

Name of the students: Todakar Rashmi Manuti Academic Year: 2023-24
Branch: Civil Class & Div: Second year - A

The feedback form is intended to collect information relating to your satisfaction towards the curriculum. Teaching – Learning process, academic performance and overall quality. The information provided by you will be kept confidential and will be used as important feedback for overall quality improvement of institution.

Please mark a tick '✓' in the appropriate cell for every statement.

Your responses below are for purpose of evaluation

4 - Strongly Agree 3 - Agree 2 - Neutral 1 - Disagree

Sr. No.	Particular	Strongly Agree	Agree	Neutral	Disagree
1	Does the curriculum have scope for acquiring strong knowledge and Intellect on the specific domains?	✓			
2	Does the curriculum have good mix of theory and laboratory aspects of courses?	✓			
3	Has the Curriculum facilitated you in developing analytical and problem-solving skills	✓			
4	Rate the curriculum in making you proficient in understanding the learning outcomes and complying it.		✓		
5	Rate the scope of the syllabus in enhancing entrepreneurship skills/ lifelong learning/ human values and ethics.	✓			
6	Rate the sequence of courses in the curriculum.	✓			
7	Did you feel the ambiance of the classroom and labs is good?	✓			
8	Are you given opportunities to demonstrate your innovative skills, leadership skills, communication skills during your study		✓		
9	Are you provided options to select elective courses/ CBCS/ Values Added Courses/ Certification courses etc. of your interest/requirement?	✓			
10	Whether the library facilities are suit for the self-learning for the students?	✓			

Suggestions (If any): To Improve the infrastructure.

The feedback form is intended to collect information relating to your satisfaction towards the curriculum. Teaching - Learning process, academic performance and overall quality. The information provided by you will be kept confidential and will be used as important feedback for overall quality improvement of institution.

Please mark a tick '✓' in the appropriate cell for every statement.

Your responses below are for purpose of evaluation

4 - Strongly Agree 3 - Agree 2- Neutral 1 - Disagree

Sr. No.	Particular	Strongly Agree	Agree	Neutral	Disagree
1	Rate your opinion on the relevancy/ sufficiency of the courses on latest technology trends.	✓			
2	Does the curriculum have good mix of theory and laboratory aspects of courses?	✓			
3	Rate the liberty you are given to contribute your ideas in course revision, curriculum design, development and innovative pedagogical initiatives	✓			
4	Does the curriculum include value added courses/ soft skill training/ domain specific electives for enhancing constructive learning.	✓			
5	Rate your satisfaction on the process followed for the periodic curriculum revision by the institution	✓			
6	Your view on whether the experiences gained through Projects/ Internships/ certifications facilitated more Employability skills/ Communication skills/ confidence in students.		✓		
7	Does the curriculum have scope for acquiring strong knowledge and intellect on the specific domains through electives/CBCS/ Value Added Courses/ Certifications, etc.	✓			
8	Your opinion on the various platforms and opportunities facilitated by the Institution to achieve your goals.	✓			
9	Does the curriculum clearly state the learning outcomes and the process of assessment and evaluation?	✓			
10	Are the academic initiatives of the department contributing towards achieving the Mission and Vision of the institution.		✓		

Suggestions (If any): Need to include software for Transportation Engg.

Suggestions and Comments

Sr. No	Suggestions/ Comments received through Faculties feedback
1	Need to include more information on subjects such as renewable energy, embedded systems, robotics and communications systems.
2	Final year projects should be based on real-world challenges and incorporate modern tools, software and technologies.
3	Update the syllabus according to the industry requirement.
4	Weightage for practicals should be increased.
5	More number of industrial visits should be arranged.

Suggestions and Comments

Sr. No	Suggestions/ Comments received through Faculties feedback
1	Incorporate lessons on coding standards, software development methodologies, and version control systems.
2	Increase hands-on experience by incorporating more lab sessions, coding assignments into the curriculum to enhance students' practical skills.
3	Update the syllabus according to the industry requirement.
4	Need more faculty collaboration with industry partners to bring in real-world engineering projects for students.
5	More importance should be given to the practicals than theory.

Sr. No	Suggestions/ Comments received through Faculties feedback
1	Introduce specialized modules on trending fields like VLSI design, quantum computing, and wearable technology to align with industry advancements.
2	Encourage integrated projects that combine hardware and software components, such as IoT systems or embedded systems design to strengthen interdisciplinary knowledge.
3	Update the syllabus according to the industry requirement.
4	Arrange more number of industrial visits.
5	More importance should be given to the practicals than theory.

10	Are the academic initiatives of the department contributing towards achieving the Mission and Vision of the institution?	34	60	3	3

1. Rate your opinion on the relevancy/ sufficiency of the courses on latest technology trends.

2. Does the curriculum have good mix of theory and laboratory aspects of courses.

3. Rate the liberty you are given to contribute your ideas in course revision, curriculum design, development and innovative pedagogical initiatives

4. Does the curriculum include value added courses/ soft skill training/ domain specific electives for enhancing constructive learning.

5. Rate your satisfaction on the process followed for the periodic curriculum revision by the institution.

6. Your view on whether the experiences gained through Projects/ Internships/ certifications facilitated more Employability skills/ Communication skills/ confidence in students.

Suggestions and Comments

Sr. No	Suggestions/ Comments received through Faculties feedback
1	Need to include advanced software related to design work.
2	Need to include software for transportation Engineering.
3	Update the syllabus according to the industry requirement.
4	Include software application for WRE.
5	Subject related to structural health monitoring and structural audit should be added into the curriculum.

10. Are the academic initiatives of the department contributing towards achieving the Mission and Vision of the institution

Suggestions and Comments

Sr. No	Suggestions/ Comments received through Faculties feedback
1	Need more faculty collaboration with industry partners to bring in real-world engineering projects for students.
2	Programs like CAD, CAE and FEA should be given more weightage.
3	Update the syllabus according to the industry requirement.
4	More number of industrial visits should be arranged.
5	More importance should be given to the practicals than theory.

Subject: Suggestions for Curriculum Enhancement Based on Feedback received from Stakeholders.

Respected sir/madam

With reference to above mentioned subject, I am writing to convey the valuable feedback we have gathered from our stakeholders, including students, faculty, Alumni students and industry representatives regarding the current syllabus in the academic year 2023-24. These suggestions are aimed at enhancing the curriculum to better align with industry demands and equip students with the necessary skills and knowledge.

Following are the key points of feedback received from stakeholders of Civil Engineering department:

1. **Increased GT Practical Hours:** There is a strong recommendation to increase the practical hours dedicated to GT (Geotechnical) to provide students with more hands-on experience.
2. **Weightage for Verbal and Non-Verbal Communication:** It was suggested that the syllabus should include components that assess and improve verbal and non-verbal communication skills, considering their significance in professional settings.
3. **Greater Focus on Practical Learning in Building Construction:** Stakeholders stressed the need for a practical-oriented approach in the building construction subject, with a shift in emphasis from theoretical knowledge to practical applications.
4. **Incorporation of Advanced Design Software:** The inclusion of advanced software specifically related to design work was highly recommended to enhance students' technical proficiency.
5. **Addition of Software for Transportation Engineering:** Stakeholders suggested incorporating relevant software for transportation engineering to ensure students are well-prepared for industry challenges in this field.
6. **Introduction of Structural Health Monitoring and Audit:** A subject focusing on structural health monitoring and structural audit should be added to the curriculum to address growing industry needs.

We strongly believe these changes will significantly enrich the curriculum, ensuring that it remains relevant and beneficial for students and the industry. We kindly request your consideration of these points and look forward to the necessary action being taken to address them.

Thank you for your attention to this matter.

Yours sincerely,

Subject: Suggestions for Curriculum Enhancement Based on Feedback received from Stakeholders.

Respected sir/madam

With reference to above mentioned subject, I am writing to convey the valuable feedback we have gathered from our stakeholders, including students, faculty, Alumni students and industry representatives regarding the current syllabus in the academic year 2023-24. These suggestions are aimed at enhancing the curriculum to better align with industry demands and equip students with the necessary skills and knowledge.

Following are the key points of feedback received from stakeholders of Computer Science and Engineering department:

- 1. Incorporation of Lessons on Coding Standards, Software Development Methodologies, and Version Control Systems:** Including these topics in the curriculum is critical for equipping students with industry-standard practices and ensuring readiness for real-world software development.
- 2. Increased Hands-On Experience:** Stakeholders recommend increasing the number of lab sessions and coding assignments in the curriculum to enhance practical skills and hands-on learning.
- 3. Focus on Real-World Applications:** It is suggested that the curriculum places greater emphasis on real-world applications and the use of industry-standard tools rather than limiting focus to theoretical understanding.

We believe these changes will significantly enrich the curriculum, ensuring that it remains relevant and beneficial for students and the industry. We kindly request your consideration of these points and look forward to the necessary action being taken to address them.

Thank you for your attention to this matter.

The Chairman,
BOS, Electronics and Computer Science Department,
Shivaji University, Kolhapur.

Subject: Suggestions for Curriculum Enhancement Based on Feedback received from Stakeholders.

Respected sir/madam

With reference to above mentioned subject, I am writing to convey the valuable feedback we have gathered from our stakeholders, including students, faculty, Alumni students and industry representatives regarding the current syllabus in the academic year 2023-24. These suggestions are aimed at enhancing the curriculum to better align with industry demands and equip students with the necessary skills and knowledge.

Following are the key points of feedback received from stakeholders of Electronics and Computer Science department:

- 1. Introduction of Specialized Modules in Trending Fields:** To keep students abreast of emerging technologies, it is suggested to include specialized modules on VLSI design, quantum computing, and wearable technology. These areas represent significant advancements in industry and academia.
- 2. Encouragement of Integrated Projects Combining Hardware and Software Components:** Stakeholders emphasized the importance of promoting interdisciplinary knowledge through projects such as IoT systems or embedded systems design. These projects will help students gain a holistic understanding of hardware and software integration.
- 3. Updating the Syllabus to Meet Industry Requirements:** It is crucial to regularly update the syllabus in line with industry standards and trends to ensure students remain competitive and well-prepared for professional challenges.

We strongly believe that incorporating these recommendations into the curriculum will significantly enhance students' academic and professional readiness. We kindly request your consideration of these suggestions and look forward to their implementation.

Thank you for your attention to this matter.

Yours sincerely,

PRINCIPAL

Subject: Suggestions for Curriculum Enhancement Based on Feedback received from Stakeholders.

Respected sir/madam

With reference to above mentioned subject, I am writing to convey the valuable feedback we have gathered from our stakeholders, including students, faculty, Alumni students and industry representatives regarding the current syllabus in the academic year 2023-24. These suggestions are aimed at enhancing the curriculum to better align with industry demands and equip students with the necessary skills and knowledge.

Following are the key points of feedback received from stakeholders of Electrical Engineering department:

1. **Increased Focus on Core Areas:** Stakeholders highlighted the need to give more importance to fields such as power systems, control systems, telecommunications, and microelectronics, as these are critical for industry readiness.
2. **Emphasis on Practical Knowledge:** A greater focus on practical learning is essential to enhance students' hands-on skills and understanding of real-world applications.
3. **Industry-Relevant Technical Knowledge:** The curriculum should prioritize teaching technical knowledge and skills that are directly applicable in industry settings.
4. **Practical-Oriented Learning:** It is suggested that more weightage be given to practical sessions rather than theoretical lessons to foster experiential learning.
5. **Implementation of an Industry-Oriented Syllabus:** Adopting an industry-oriented curriculum will ensure students are better equipped to meet professional expectations.
6. **Inclusion of Emerging Technologies:** The syllabus should include comprehensive content on renewable energy, embedded systems, robotics, and communication systems to reflect advancements in these vital fields.
7. **Addition of MATLAB-Based Modules:** Including MATLAB-based training and projects in the syllabus would significantly enhance student's analytical and computational skills.

We strongly believe these changes will significantly enrich the curriculum, ensuring that it remains relevant and beneficial for students and the industry. We kindly request your consideration of these points and look forward to the necessary action being taken to address them.

Thank you for your attention to this matter.

Yours sincerely,

Subject: Suggestions for Curriculum Enhancement Based on Feedback received from Stakeholders.

Respected sir/madam

With reference to above mentioned subject, I am writing to convey the valuable feedback we have gathered from our stakeholders, including students, faculty, Alumni students and industry representatives regarding the current syllabus in the academic year 2023-24. These suggestions are aimed at enhancing the curriculum to better align with industry demands and equip students with the necessary skills and knowledge.

Following are the key points of feedback received from stakeholders of Mechanical Engineering department:

1. **Focus on Emerging Technologies:** It is recommended to place greater emphasis on emerging fields like Artificial Intelligence (AI) in engineering, 3D printing, and renewable energy to keep students updated with cutting-edge developments.
2. **Incorporation of New Design Software:** Adding modern design software to the curriculum is essential for equipping students with industry-relevant tools and skills.
3. **Emphasis on Industry-Relevant Technical Skills:** Strong focus should be placed on teaching technical skills such as CAD design, Finite Element Analysis (FEA) and simulation software to meet industry expectations.
4. **Expansion of Renewable Energy Topics:** The curriculum should include additional subjects in solar power, wind energy, and energy storage systems to address the growing importance of renewable energy.
5. **Increased Weightage for Programs like CAD, CAE and FEA:** Programs focusing on CAD, Computer-Aided Engineering (CAE), and FEA should be given more prominence and weightage in the curriculum.
6. **Practical-Oriented Learning:** A shift in focus from theoretical content to practical applications is necessary to foster hands-on learning experiences.
7. **Industrial Training Every Semester:** Stakeholders suggested arranging industrial training at the end of every semester to provide students with real-world exposure and strengthen their professional readiness.

We strongly believe these changes will significantly enrich the curriculum, ensuring that it remains relevant and beneficial for students and the industry. We kindly request your consideration of these points and look forward to the necessary action being taken to address them.

Thank you for your attention to this matter.
